## PRE-ALGEBRA ACCELERATED **OPERATIONS WITH INTEGERS**

## What's the Score?

To find out on which score the arrow lands, cross out the answer to each exercise below. The arrow lands on the number that is not crossed out at the end.

1. 
$$-8.5 + -3 =$$

3. 
$$0.3 + -0.2 - 1.5 =$$

5. 
$$\frac{-15}{3} + 1 = \underline{\hspace{1cm}}$$

9. 
$$(-2)^2 =$$
\_\_\_\_\_\_\_  
11.  $-3 - 15.1 =$ \_\_\_\_\_\_

11. 
$$-3 - 15.1 =$$

13. 
$$-0.4 \div (-0.25) =$$

15. 
$$(-2.5 + -3.1) + 5.6 =$$

The arrow lands on \_\_\_\_\_.

2. The opposite of 
$$-5.6 =$$
 \_\_\_\_\_

4. 
$$(-8.1)(-2) =$$

6. 
$$(-2)^3 =$$

8. 
$$-4.9 \div (-1) =$$

10. 
$$0.75(-0.5) =$$

12. 
$$7.1 + -15 =$$

14. 
$$(4)^{-1} =$$
\_\_\_\_\_

**16.** 
$$(5)(-1) + (-3)(-2) =$$
