

# EQUATION HEXA-MAZE

To solve this maze, start with the number in the center. This number is the solution to the equation in one of the adjacent(next to) cells. Move to that cell. The number in the box of the new cell will then be the solution to the equation in the next cell. At each move, you may only move to an adjacent cell. You must reach the End Here cell to have completed the maze. Each cell is used only once and all cells are used.
