

Name \_\_\_\_\_ Period \_\_\_\_\_

Use the equations to create an input/output table. Graph the ordered pairs that you find on the coordinate plane. On the last page, give the type of slope for each equation.

1)  $y = 2x + 4$

x	y

2)  $y = 5x - 3$

x	y

3)  $y = -3x + 1$

x	y

4)  $y = \frac{1}{2}x + 2$

x	y

5)  $y = 4x - 2$

x	y

6)  $y = -3$

x	y

7)  $y = -2x + 6$

x	y

8)  $y = -x + 5$

x	y

9)  $y = -\frac{1}{2}x - 4$

x	y

10)  $y = 6x - 5$

x	y

11)  $y = -3x + 2$

x	y

12)  $x = 7$

x	y

Continue to slope question on the back of this page.

Define the type of slope found in each graph.
