You have invited 15 people to a party.

1)

a) How many cans of water are needed for each can of concentrate to make lemonade?

b) If you plan to serve each person 8 fl oz (1 cup), how many servings does one can make?

c) What is the ratio of water to frozen lemonade concentrate?

2)

a) How many cans of frozen concentrate would you need to buy for the party?

b) How much water would you need to add in all?

c) How much lemonade would you have?

3) If you were adding 12 ice cubes that would melt over time, what adjustments would you make to the recipe? (1 ice cube is approx .3 cup of water)
