Indirect Measurement Worksheet

Set up a proportion and solve for x. Show all work!!!

$$\frac{\text{Tree}}{\text{Man}} = \frac{x}{1.9} = \frac{2.5}{1.5}$$

$$\frac{1.5x}{1.5} = \frac{4.75}{1.5}$$

$$x = 3.17 \text{ m.}$$

$$\frac{\text{flag}}{\text{man}} = \frac{x}{5} = \frac{24}{8}$$

$$\frac{8x}{8} = \frac{120}{8}$$

$$x = 15 \text{ ft.}$$

Set up a proportion and solve for x. Show all work!!!

$$\frac{\text{Tree}}{\text{man}} = \frac{x}{5} = \frac{30}{4}$$

$$\frac{4x}{4} = \frac{150}{4}$$

$$x = 37.5 \text{ ft.}$$

$$\frac{\text{flag}}{\text{girl}} = \frac{x}{54} = \frac{90}{36}$$

$$\frac{36x}{36} = \frac{4860}{36}$$

$$x = 135 \text{ in.}$$

$$\frac{\text{small}}{\text{large}} = \frac{8}{x} = \frac{5}{72}$$

$$8x = 5 \cdot 72$$

$$\frac{8x}{8} = \frac{360}{8}$$

$$x = 115.2 \text{ in.}$$

$$\frac{\text{cactus}}{\text{animal}} = \frac{x}{59} = \frac{7}{4}$$

$$4x = 413$$

$$\frac{4x}{4} = \frac{413}{4}$$

$$x = 103.25 \text{ ft}$$

*** - Challenge

$$\frac{\text{large}}{\text{small}} = \frac{30+x}{30} = \frac{50}{40}$$

$$1500 = 1200 + 40x$$

$$-1200$$

$$300 = 40x$$

$$x = 7.5 \text{ ft}$$

Draw a picture. Set up a proportion. Solve using cross products.

8. On a sunny day, if a 36-inch yardstick casts a 21-inch shadow, how tall is a building whose shadow is 168ft?

$$\frac{\text{stick}}{\text{Bldg}} = \frac{36}{x} = \frac{21}{168}$$

$$\frac{1}{21} = \frac{6048}{21}$$

$$x = 288 \text{ in.}$$

$$\text{or } 96 \text{ ft.}$$

9. A 4-ft person standing near a telephone pole has a shadow 3-ft long. At the same time, the telephone pole has a shadow of 18-ft long. What is the height of the telephone pole?

$$\frac{\text{person}}{\text{pole}} = \frac{4}{x} = \frac{3}{18}$$

$$\frac{3x}{3} = \frac{72}{3}$$

$$x = 24 \text{ ft.}$$
