Directions: Solve each expression and circle the solution on the previous page. Record your answers on this page.

In May 1804 Thomas Jefferson sent two men to explore the

1) _____ and search for a new water route. Those men were

2) _____. Their expedition, including nearly fifty

others, was called 3) _____. During their first

stop in November of 1804, the group built 4) _____ to

protect themselves from winter and the 5) _____ Indians.

They also hired an interpreter who brought along his wife,

6) _____, and son. Over the next leg of the journey,

the group encountered 7) _____ and large

waterfalls before eventually reaching the 8) _____.

After traveling down several rivers, the expedition finally made it

to the 9) _____. By now it was November so they

decided to stay on the coast at 10) _____ for a few

months. As soon as winter was over the expedition was ready to

head home.
