

Unit: Probability

Name _____
Date _____ Pd _____

SIMPLE PROBABILITY

Probability is the _____ of an event happening and is expressed as a number between _____ and _____.

Label the terms on the number line: unlikely, equally likely, impossible, certain, and likely.

Read each example and label the situation with one of the terms above.

1. Snowing when it's 40°F outside	2. Burning your dinner if you cook it too long	3. Water boiling at 75°F
4. Getting a ticket if you are speeding	5. Scoring two points on a safety in a football game	6. A coin landing on heads when it is flipped

SIMPLE PROBABILITY

• Simple probability is the ratio of _____ outcomes to the _____ number of outcomes.

Ex: $P(A) =$

7. What is the probability of choosing a marble with stripes?

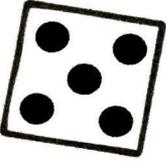

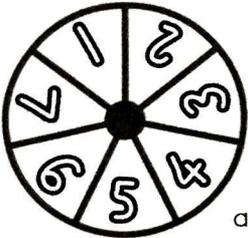

$P(\text{stripes})$ _____
 $P(\text{diamonds})$ _____

8. What is the probability of spinning a W?

$P(W)$ _____
 $P(\text{vowel})$ _____

Read each of the problems below and determine the probability of each outcome.

<p>9. A standard number cube is rolled. What is the probability of rolling...</p>  <p style="text-align: right;">a 6? _____</p> <p style="text-align: right;">a 5? _____</p> <p style="text-align: right;">an odd number? _____</p>	<p>10. A laundry basket has 24 socks in it. Six were navy, 10 were black, and the remaining were white. What is the probability of drawing...</p> <p style="text-align: right;">a black sock? _____</p> <p style="text-align: right;">a white sock? _____</p> <p style="text-align: right;">a navy sock? _____</p>
<p>11. The spinner below is spun. What is the probability of spinning...</p>  <p style="text-align: right;">not a 6? _____</p> <p style="text-align: right;">a 3 or a 4? _____</p> <p style="text-align: right;">an odd number? _____</p>	<p>12. The letters in the word SOCCER are put into a bag and drawn randomly. What is the probability of choosing...</p> <p style="text-align: right;">a vowel? _____</p> <p style="text-align: right;">a consonant? _____</p> <p style="text-align: right;">the letter C? _____</p>
<p>13. At the pediatrician's office, patients are able to draw a toy from the toy bin. The toy bin has 12 puzzles, 16 boxes of crayons, and 2 bouncy balls. What is the probability of drawing...</p> <p style="text-align: right;">anything but a bouncy ball? _____</p> <p style="text-align: right;">a box of crayons? _____</p> <p style="text-align: right;">a puzzle? _____</p>	<p>14. In the movie drawer, there are seven action movies, five comedies, and three dramas. What is the probability of choosing...</p> <p style="text-align: right;">a drama? _____</p> <p style="text-align: right;">anything but a comedy? _____</p> <p style="text-align: right;">an action? _____</p>

Answer the question below.

<p>15. Students standing in line for lunch were surveyed about their favorite meal. Their responses are shown below. If one student is picked randomly, then which of the following is true?</p> <table border="1" style="width: 100%; border-collapse: collapse; margin-top: 10px;"> <thead> <tr> <th style="text-align: center;">Meal</th> <th style="text-align: center;">Number of Students</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">Pizza</td> <td style="text-align: center;">26</td> </tr> <tr> <td style="text-align: center;">Spaghetti</td> <td style="text-align: center;">8</td> </tr> <tr> <td style="text-align: center;">Fajitas</td> <td style="text-align: center;">16</td> </tr> </tbody> </table>	Meal	Number of Students	Pizza	26	Spaghetti	8	Fajitas	16	<p>A. The student's favorite meal is half as likely to be pizza than spaghetti.</p> <p>B. The student's favorite meal is more likely to be fajitas than pizza.</p> <p>C. The student's favorite meal is twice as likely to be spaghetti than pizza.</p> <p>D. The student's favorite meal is twice as likely to be fajitas than spaghetti.</p>
Meal	Number of Students								
Pizza	26								
Spaghetti	8								
Fajitas	16
